Letter of Support for Therapeutic Tricycle

Please would you consider this application for funding for a therapeutic tricycle?

I have known Gwen in my capacity as her physiotherapist since November 2014. She is a little girl with Down syndrome and complex respiratory problems. Gwen is able to walk unaided, but would struggle to ride a bicycle or tricycle. She is a very active little girl, who would love to have a trike of her own. Gwen would benefit from regular use of a trike from a cardiovascular and muscle strength perspective.

If you require any further information I can be contacted on 07785511698.

Juliet Weston
Physiotherapist
